

# Masculinities at D-INFK

Last semester I was enrolled in the course 'Science and Masculinity in History' and I am currently writing a short paper about the computer science department for this course. I would like to find out what kind of masculinities exist within D-INFK. In order to get a bit of an inside look I would greatly appreciate it if you could take the time to answer a few question.

Can you tell me about your experience in ETH's computer science department?
